

New Process Technician Apprenticeship... Your route to a future career with a world-leading employer

Find out more at
our open evening:
Wed 28th January 6-9pm
CATCH Training Centre,
Stallingborough

Hull College is offering a brand new Process Technician Apprenticeship starting from September 2009. The new apprenticeship has been developed with Humber Chemical Focus and the valuable expertise of local companies, BP Chemicals, Cristal Global, Huntsman Tioxide, Nippon Gohsei and Total LOR to provide enthusiastic young people with the skills and knowledge that world-leading employers value.

The initial first year will start with Process Operations at Level 2, then moving onto the advanced program of Level 3. Training will be delivered at CATCH, a world-class purpose built training facility based in Stallingborough, Grimsby that provides an authentic 'real plant' environment.

How the apprenticeship will benefit you:

- Achieve a nationally recognised qualification valued by employers
- Earn while you learn - combine training with working for an employer at the same time
- Gain valuable hands-on experience and enhanced career prospects
