## MASTERCLASS

(this is a sponsored event)  
in

### 'Effectiveness of Risk'

Risk hierarchy reflects the fact that eliminating and controlling risk by using physical engineering controls and safeguards is more reliable than relying solely on people.

How effective are you at controlling risk? How do you know?

- ◆ How to measure risk?
- ◆ How to measure risk improvement?
- ◆ How to measure effectiveness of your control measures?

*"In any given set of circumstances, some risk control measures will be 'better' than others and it is obviously preferable to use the 'best' option. However, there are various different criteria which can be used to define 'best'."*

- Listen to Dr. Tony Boyle explain this to you in his own words.

NVQ Candidates may bring their Tony Boyle text books for signing.

Certification:- This session will qualify for CPD points.
